ABOUT US

Your Trusted Partner for Used Hydraulic Attachments

REPALO has specialized in the international trade of used hydraulic components for excavators and heavy machinery since 2017.

Thanks to our international sourcing network and industry expertise, we identify and supply reliable parts that meet the highest standards of quality and performance.

We support our customers throughout the entire purchasing process, offering competitive solutions, professional advice, and efficient global logistics.

Why Choose REPALO

Quality Used Demolition Attachments

1

We carefully select every attachment from trusted suppliers and reputable owners across Europe.

Our portfolio includes equipment from leading brands, ensuring reliability, performance, and long-term value for our customers.

Every machine is evaluated according to strict quality standards before being offered to the market.

Dealer-Focused Approach

2

We work closely with retailers and industry professionals to identify the equipment best suited to their specific needs.

From identifying suppliers through to purchase and delivery, we support our customers throughout the entire process, helping them secure the right equipment at the best possible price.

Our goal is to build long-term partnerships based on trust, expertise, and customer satisfaction.

Worldwide Delivery

3

We organize safe and efficient shipments to destinations worldwide.

Thanks to our logistics experience and international network, we ensure reliable transportation, timely deliveries, and complete support throughout the shipping process.

No matter where your business is located, REPALO can deliver the right equipment directly to your destination.

Our Mission

Our mission is to meet our customers' needs by sourcing the best used hydraulic attachments from around the world.

With extensive knowledge of the demolition industry and a strong international network, we connect buyers and sellers through relationships built on trust, transparency, and mutual success.

We work every day to provide dealers and traders with a competitive advantage, helping them identify the right opportunities and access quality equipment at the best possible value.

Our goal is to simplify the process of buying and selling used attachments, making every transaction safe, efficient, and reliable.

At REPALO, we believe that every attachment has a story and a purpose. Our job is to give it a second life by connecting it with the right owner, in the right place, at the right time.

REPALO

Quality Control Process

At REPALO, quality and transparency are at the heart of every transaction. Before offering an accessory to our customers, we personally inspect and evaluate it, checking its overall condition, functionality, level of wear, and overall performance.

We believe that trust is built through transparency, which is why every accessory comes with an honest and detailed assessment of its condition.

Germany

On-site inspection of a Brokk 400 performed by REPALO Sales Specialist Francesco Caldarola.

As part of our quality control process, our Sales Specialist, Francesco Caldarola, recently travelled to Germany to personally inspect a Brokk 400 demolition robot.

During the visit, the machine was carefully evaluated to verify its operating condition, overall status, and compliance with the information provided by the seller.

This direct approach allows REPALO to offer an additional level of confidence to customers, ensuring that every opportunity is thoroughly assessed before reaching the market.

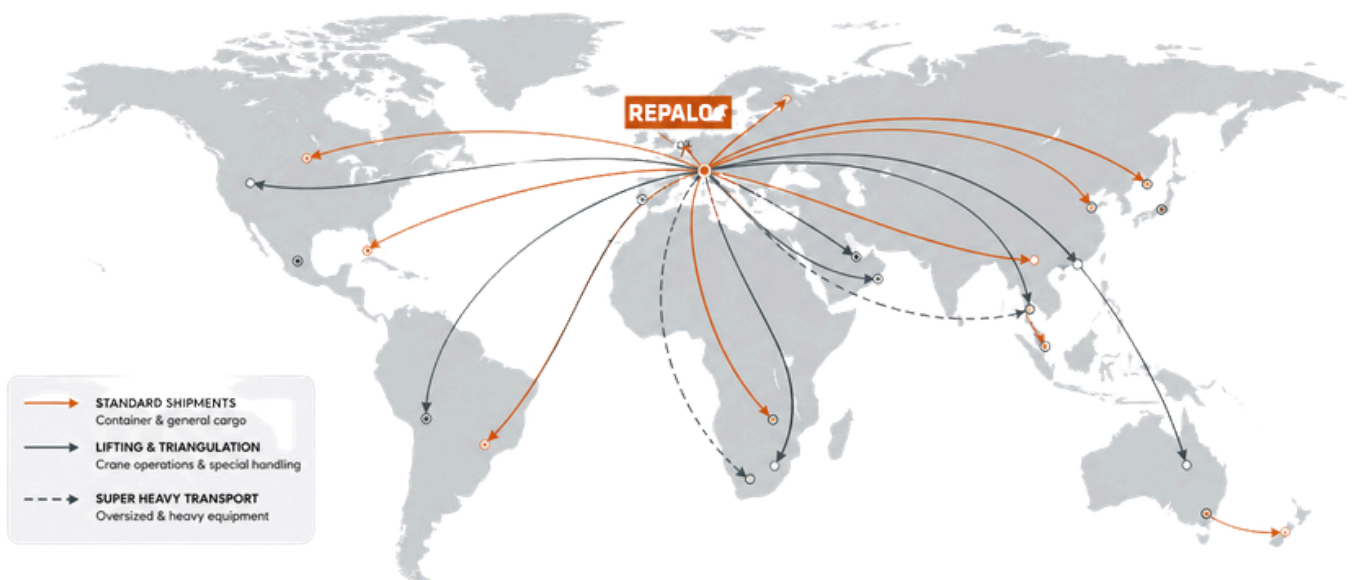

Worldwide Trading

REPALO provides reliable shipping solutions for used hydraulic attachments to destinations worldwide.

Through a trusted network of logistics partners and industry specialists, we manage every stage of the transportation process, ensuring safe handling, efficient coordination, and timely delivery.

Our services include standard shipments, complex lifting operations, triangulation logistics, and the transportation of oversized and super-heavy equipment.

No matter the destination, we are committed to delivering the right attachment safely, efficiently, and with complete transparency throughout the entire process.
