REPALO 

MORE THAN A TRADE SHOW.

Over the years, Repalo has never stopped showing up where the industry meets.

From **Steinexpo** and **Bauma** to **Ecomondo**, **Samoter**, **IFAT** and **MAWEV**, trade shows have always been an important part of our journey.

They give us the opportunity to **keep up with a constantly changing market**, discover new technologies and understand where the demolition industry is heading.

But for us, it has never been only about machines. Trade shows mean **meeting old friends and making new ones**, exchanging ideas and experiences, discovering new opportunities and building relationships with professional dealers from all over Europe.

Many of those business relationships have grown into **long-term partnerships** — and, in many cases, **real friendships**.

OUR LATEST STOP

STEINEXPO 2026

Back to the quarry. Back where the industry meets.

MAWEV — 2024

NEW TECHNOLOGIES, SAME PASSION.

BAUMA — 2025

PEOPLE, IDEAS, OPPORTUNITIES.

STEINEXPO 2026

IN A REAL QUARRY,
REAL PEOPLE.
REAL OPPORTUNITIES.

We recently attended
Steinexpo 2026, a unique
event in a real quarry, where
the industry comes to life.

We had the opportunity to
showcase our catalogs of new
attachments under the **Repalo**
brand, meet many of our long-time
friends and connect with new
professional dealers.

Access to the exhibition area was
allowed only with safety helmets,
in a **real working environment**, with
authentic site signs and permanent
machine demonstrations.

All the major international brands
were there, and we could see
equipment in action, exchange
ideas
and explore new business
opportunities for the future.

SEE YOU AT THE NEXT ONE.

SAME INDUSTRY.
NEW MEETINGS.
MORE OPPORTUNITIES.

**Are you a dealer,
manufacturer or demolition
professional?**

Let's meet at the next event or
somewhere along the road.
We're always open to new
ideas, collaborations and
opportunities.
