

INSIDE THE REPALO REBUILD

REPALO 

INDEX

01

INTRODUCTION

A rebuild is not a repaint.
Our approach to giving used
attachments a second life.

02

WHEN IT'S WORTH REBUILDING

How we evaluate a used
attachment
and decide if it's worth the
investment.

03

THE REBUILD PROCESS

Step by step: from inspection
and disassembly to repair,
reassembly and testing.

04

REPALO'S REBUILD

Real examples of attachments
we rebuild in our workshop.

05

THE ADDED VALUE

What you get with a Repalo
rebuild attachment.
Quality, reliability and support
that make the difference.

REBUILD IS NOT A REPAINT.

Repalo has been working for almost 10 years worldwide to find the most efficient and cost-effective solution for every customer.

Buying used has many advantages: it supports sustainability and protects your budget, but only if done right and with the right knowledge.

We always aim to select used attachments in the best possible condition, so they can be ready for our customers in the shortest time. When this is not possible, we choose to **rebuild**.

We search, we buy, we rebuild and we test every machine to make sure it is ready to work in the best possible conditions.

This is how we turn potential into performance.

WHEN IT'S WORTH REBUILDING.

At **Repalo**, we receive evaluation requests from all over Europe. Every attachment is carefully inspected in person following a clear process. This allows us to understand its real condition and decide if a rebuild is the right choice.

01

FIND THE RIGHT OPPORTUNITY

We look for the best available unit on the market.

01

02

02

CHECK MAIN COMPONENTS

We inspect cylinders, housings, pins and bushings.

03

03

CHECK WHAT'S MISSING

We verify that all parts are present and assess what needs replacement.

04

WORK HARD TO SHAPE IT RIGHT

We restore worn parts and prepare the attachment for rebuild.

04

05

HYDRAULIC WORKING TEST

We run a functional test to ensure maximum performance and reliability.

05

THE REBUILD PROCESS.

After inspection, the attachment is fully rebuilt. This doesn't mean just a coat of paint: we **repair** or **replace** pistons, housing and cylinders, then **test** it to check real performance and detect any oil leaks or other issues.

FULL REPAIR

Pistons, housing, cylinders and critical parts.

PROFESSIONAL REBUILD

Every component is restored or replaced when necessary.

PERFORMANCE TEST

We test under pressure to check power and functionality.

QUALITY CHECK

Oil leaks and potential issues are detected and solved.

REPALO'S REBUILD.

Every rebuild is **different**.

We adapt to our clients' needs and make sure every attachment is reliable, efficient and **ready to perform**.

V55 REBUILD

Shipped to Germany

Hallo Pasquale.
Ich möchte mich kurz melden und euch für die super Arbeit an dem V55 herzlich danken. Der Hammer ist "top" geworden. Wir alle hier sind sehr beeindruckt! 🍷

Schönes Wochenende und liebe Grüße aus Sachsen 🍷👤

Juliane

V55 REBUILD

V32 REBUILD

HB 2200 DP REBUILD

V32 REBUILD

At Repalo, we offer **real value** by selecting used attachments from the **best top brands**, ensuring they are **highly functional** and priced well below market value.

Our customers trust us for our **honesty, quality** and constant support. We provide **fast and efficient shipping** all over the world, so your attachment arrives ready to work.
